

AdlerandAllan Group Waste Disposal Policy

We recognise that if wastes are not securely contained and properly disposed of they can present health and safety risks and damage the environment. We are a responsible company that manages hazardous wastes and on occasion may produce hazardous wastes as a result of our operational business activities:

It is our policy to:

- Apply the waste hierarchy principles of prevention; prepare for re-use; recycling; other recovery e.g. energy recovery; disposal;
- Identify different waste streams using the waste hierarchy principles;
- Segregate different types of waste applying the waste hierarchy principles;
- Provide suitable storage arrangements for each type of waste, so as to ensure it is secure and does not escape;
- Clearly label waste containers as to their contents;
- Keep records of quantity and composition of different wastes;
- Provide permitted treatment of designated wastes to best industry practice;
- Maintain MCERTS accredited monitoring systems for our waste treatment facilities;
- Only transfer waste to someone with the licenced authority to take it;
- Pass a description of the waste to the person removing the waste;
- Keep copies of transfer/consignment notes covering the movements of waste, making sure the documentation is properly completed;
- Maintain the storage arrangement for waste and to undertake periodic checks upon them.

Waste Disposal Procedure

Signed: Mr. Mark Calvert

Position: Managing Director
