Rapid Response

Nationwide Spill and Emergency Response Services

Precision Emergency Response Services

Adler and Allan tackles challenging emergency situations from road traffic accidents to major industrial disasters. Our formidable reputation is built on human expertise, specialist equipment, a prompt and efficient service and a willingness to tackle difficult jobs that require experienced and innovative professional intervention.

Added-value Spill Response Services

Our Spill Response services include:

- 24/7 oil and chemical spill response
- Sampling and analysis
- Environmental site investigations
- Equipment and boom hire
- Mobile oil water separators
- Remediation of contaminated sites
- Project management and reporting

Our complementary services include:

- Marine spill response
- Tanker rollover product recovery
- Fuel uplift and transfer
- Site regulatory compliance audits
- Contingency planning
- Spill training
- Spill simulation exercises
- Spill kits and absorbents

Oil and Chemical Spill Response

Rapid response, expert analysis and prompt action are the key components of effective oil and chemical spill damage-limitation. Highly trained professionals equipped with the latest spill and clean-up technology man Adler and Allan's national response centres, ready to mobilise at a moment's notice.

Who's covering you?

Marine Spill Response

Adler and Allan is the premier national marine spill response company in the UK, accredited by the Nautical Institute on behalf of the Maritime and Coastguard Agency.

- Accredited Tier 2 pollution response
- Harbour and coastline oil spill response
- Training and response exercises
- Marine pollution contingency planning
- Marine spill response consultancy

Are you fully prepared?

Disaster Response

Call Adler and Allan 24/7 in the event of a major spill, serious flood, explosion, power cut, fuel blockade or even terrorist attack. We enjoy unrivalled disaster response expertise as demonstrated in the aftermath of the Buncefield explosion and fire, for which we were appointed Principal Contractor.

From our national network of bases, we respond quickly and effectively to public and private sector emergencies, including:

- Oil and chemical spills
- Critical fuel deliveries
- Disaster recovery
- Flood relief
- Firewater containment

Working as Principal Contractor in the aftermath of the Buncefield explosion and fire was an exceptional team effort and an unrivalled demonstration of Adler and Allan disaster response capability.

Flood Response

Recent events have demonstrated how susceptible many businesses and communities are to flooding.

Adler and Allan flood response teams minimise disruption to major infrastructure, transport links, power and water supplies by assisting with flood defences and pumping, tankering and disposing of flood waters.

Environmental Accreditations

Adler and Allan's environmental credentials speak for themselves, and we are proud to promote the highest environmental standards.

We are board members of leading body UK Spill, are a registered waste carrier, and have been awarded ISO 14001 Environmental Management Systems and ISO 9001 Quality Management accreditations.

UKSpill
ASSOCIATION

Are you fully risk-compliant?

Post-Spill Remediation

Once a spill incident is under control and environmental impacts have been minimised, the Adler and Allan remediation team complete the job. This can include site investigations followed by thorough decontamination of the site, plant, vehicles, and equipment as required.

Spill Response Training

However minor its impact on the environment, an accidental spill can have a major impact on the finances of the company involved. Rapid on-site pollution-fighting response helps avoid significant clean-up and legal costs.

Adler and Allan industry-accredited spill training courses will help you provide this immediate response – from Foundation to Commander level – and can include the development of, and participation in, coastline oil spill exercises.

Adler and Allan expertise ranges from pre-emptive pre-spill training, to emergency spill response, to post-spill remediation.

Spill Kits, Absorbents and Equipment

The Adler and Allan range of emergency equipment includes:

- Emergency oil and chemical spill kits
- Absorbents
- Booms, skimmers and separators
- Pumps

We also provide safety audits and spill kit application advice.

Environmental Consultancy Services

Adler and Allan provides a range of consultancy services to public and private sector organisations to help them comply with current environmental legislation and best practice. This combination of consultancy and operational support is industry-unique.

Contingency Planning

No business or organisation can claim immunity from the risks of a serious incident impacting normal operations. Minimising the risks, whilst ensuring rapid and cost-effective recovery from an incident, is therefore a major operational priority.

Adler and Allan will help you fulfil your responsibilities in this respect through expert assistance in contingency planning and the provision of disaster recovery solutions.

The Adler and Allan disaster contingency mantra:
● Prioritise ● Prepare ● Plan ● Practice ● Perform
