

## **Adler and Allan acquire hazardous material specialist Flotech Performance Systems Ltd**

**London, 15 March 2021**, Environmental risk reduction specialist, [Adler and Allan](#), announces the acquisition of hazardous material handling specialist [Flotech Performance Systems Limited](#) (Flotech).

Flotech provides design, fabrication, consultancy, project management, planned and reactive maintenance for the storage, transfer and distribution of industrial liquids, gases and waste. Its highly specialised services cover additive and blending, fluid transfer, access solutions, storage tank equipment, and vapour recovery.

Mike Willink, Group Development Director, Adler and Allan, said: “With our already extensive capability in hazardous materials, this acquisition helps us to handle an even greater range of substances in a broader set of situations and environments, including those that will become more important in the future, such as hydrogen. By combining this acquisition with our existing environmental services, we are now able to be a much more strategic environmental partner to our customers.”

Thomas Sadler, Managing Director, Flotech, said: “We are delighted to be joining the Adler and Allan family today. With our turnkey solutions we are already helping customers with the storage, transfer and distribution of liquid and gas products. As businesses decarbonise their processes, this move will help customers in their ability to blend contaminants into less harmful chemicals and then blend them into more useful substances such as the process for manufacturing hydrogen.”

The announcement is part of a series of strategic acquisitions which includes electrical specialists AMGS Electrical and Oneline Surveys and supports Adler and Allan’s ambitious growth plans to solve more customer challenges in a broader range of sectors with a joined-up approach to its services.

Adler and Allan is the UK’s leading provider of environmental risk reduction services, covering both emergency response and scheduled maintenance across a wide range of critical asset infrastructure and contaminants.

### **Notes to editors:**

Adler and Allan provide market leading environmental risk reduction through preventative and responsive solutions, offering an expert 24-7 service to its customers. Adler and Allan’s customers include multinational blue-chip organisations across a wide range of sectors both private and public including defence, utility, marine, fuel, forecourt and facilities management. Adler and Allan give its customers peace of mind in detecting and identifying the environmental risks posed to their business. Its broad range of risk mitigation products and services keep businesses strong, reducing the prospect of litigation, costly fines and bad publicity, as well as reducing the threat to the environment. In a world where the environment and legislation are in constant flux, Adler and Allan also provides emergency response in a variety of settings.

### **Key facts:**

- Over 20 depots across the whole of the UK
- UK's largest response group with over 500 trained operating staff

- Attended over 10,000 emergency pollution callouts each year for the last five years
- 250+ UK organisations have emergency response contracts with Adler and Allan
- Adler and Allan maintain over 100 million litres of fuel at client facilities annually
- Completed 32,500 on-site tasks for clients during the last 5-years
